Tocotrienol can be part of the Solution!

In a study conducted by Professor Lindsay Brown of University of Southern Queensland with Davoslife's **Naturale³ Tocotrienol**, the typical bio-markers associated with obesity indicated the following trends (as compared with the diet-induced hypertensive obesity cohort)¹:

showed
anti-inflammation

could
reduce risks of fatty liver disease

showed
reduction of collagen deposition

(Collagen deposition is associated with ischemia heart disease)

improved glucose tolerance
by **24.8%**

improved insulin tolerance
by **52.6%**

improved cholesterol
by **46.5%**

improved triglycerides
by **23.1%**

Professor Lindsay's findings added to the current pool of findings on **Tocotrienol's** capability on management of various health issues linked to obesity²³⁴. As such, **Tocotrienol** could be the complementary dietary strategy in reducing risks of obesity-related diseases such as metabolic syndrome, cardiovascular and liver damages

About Davos Life Science

DavosLife, established in 2004 is a wholly owned subsidiary of Kuala Lumpur Kepong Berhad (KLK) who is one of the largest oil palm plantation and processing company publicly listed in Malaysia. It researches on the health benefits of palm tocotrienol which is extracted at its dedicated manufacturing facility based on state of the art technology. It is also vertically integrated with KLK Plantations & KLK Manufacturing Division (KLK OLEO) for its supply of palm tocotrienols.

DavosLife's **Naturale³ Tocotrienol** product range is recognized by leading international nutraceutical and cosmeceutical companies under the brand name, **Naturale³**. Visit www.davoslife.com for more details.
